

Excel Assignment

Conditional Formatting & Filtering

Conditional Formatting

1. Highlight all transactions where **Net Sales are greater than \$3,000**.
2. Highlight all transactions where **Cost is greater than \$1,500**.
3. Apply **Data Bars** to the Net Sales column.
4. Apply a **3-Color Scale** to the Cost column.
5. Highlight the entire row where the **Product is "Quad"**.
6. Highlight transactions where **Net Sales are greater than \$3,000 AND Cost is greater than \$1,500**.
7. Highlight transactions where **Net Sales – Cost is greater than \$1,500**.

Filtering

8. Filter the dataset to display only **Quad and Darnell** transactions.
9. Display transactions where **Net Sales are between \$2,000 and \$4,000**.
10. Display only transactions occurring **from January 20, 2026 onward**.
11. Display transactions where **Cost is less than \$500 AND Net Sales are greater than \$1,000**.
12. Display transactions where the **Product is Bellen or Carlota and Net Sales are greater than \$500**.

Advanced Filter

13. Extract all transactions where **Product = Quad AND Net Sales > \$3,000**.
14. Extract all transactions where **Product = Darnell OR Product = Fun Fly**.
15. Extract transactions where **Net Sales > \$4,000 OR Cost > \$2,000**.
16. Extract transactions where **Product = Quad AND Net Sales > \$3,000, OR Product = Darnell AND Cost > \$1,000**.
17. Extract transactions where **Date is after January 20, 2026 AND Net Sales > \$3,000**.

Formula + Conditional Formatting

18. Create a **Profit** column using **Net Sales – Cost**. Highlight all transactions where **Profit is greater than \$1,500**.

Formula + Filter

19. Create a **Profit Margin** column using **(Net Sales – Cost) / Net Sales**. Filter the dataset to show transactions with a **Profit Margin greater than 50%**.

Advanced Challenge

20. Using **Advanced Filter**, extract transactions where **Net Sales are greater than the average Net Sales of the entire dataset**.

Instructions

For Questions **13–17 and 20**, create a proper **criteria range** and use **Data → Advanced Filter** instead of the normal Filter option.

Advanced Filter Reminder

Logic	Criteria Range Structure
AND	Put criteria on the same row under different columns.
OR	Put criteria on separate rows.
AND + OR	Use separate rows for each OR condition; keep AND criteria on the same row.
