PROBLEMS ON NUMBER SYSTEM

7 Practice Questions

Question 1 — Convert Binary to Decimal

Problem Statement

Convert a binary number to its decimal equivalent.

Input

A binary number N.

Output

Print the decimal equivalent of N.

Examples

Example 1:

Input: 1011

Output: 11

Explanation: 1011 in binary is 11 in decimal.

Example 2:

Input: 100

Output: 4

Explanation: 100 in binary is 4 in decimal.

Question 2 — Convert Binary to Octal

Problem Statement

Convert a binary number to its octal equivalent.

Input

A binary number N.

Output

Print the octal equivalent of N.

Examples

Example 1:

Input: 1100110

Output: 146

Explanation: 1100110 in binary is 146 in octal.

Example 2:

Input: 11111

Output: 37

Explanation: 11111 in binary is 37 in octal.

Question 3 — Convert Decimal to Binary

Problem Statement

Convert a decimal number to its binary representation.

Input

A decimal number N.

Output

Print the binary representation of N.

Examples

Example 1:

Input: 15

Output: 1111

Explanation: 15 in decimal is represented as 1111 in binary.

Example 2:

Input: 18

Output: 10010

Explanation: 18 in decimal is represented as 10010 in binary.

Question 4 — Convert Decimal to Octal

Problem Statement

Given a decimal number, convert it into its octal equivalent.

Input

A decimal number N.

Output

Print the octal equivalent of N.

Examples

Example 1:

Input: 17

Output: 21

Explanation: 17 in decimal is 21 in octal.

Example 2:

Input: 45

Output: 55

Explanation: 45 in decimal is 55 in octal.

Question 5 — Convert Octal to Binary

Problem Statement

Given an octal number, convert it into its binary equivalent.

Input

An octal number N.

Output

Print the binary equivalent of N.

Examples

Example 1:

Input: 345

Output: 011100101

Explanation: The binary equivalent of octal 345 is 011100101.

Example 2:

Input: 170

Output: 001111000

Explanation: The binary equivalent of octal 170 is 001111000.

Question 6 — Convert Octal to Decimal

Problem Statement

Given an octal number, convert it into its decimal equivalent.

Input

An octal number N.

Output

Print the decimal equivalent of N.

Examples

Example 1:

Input: 345

Output: 229

Explanation: The decimal equivalent of octal 345 is 229.

Example 2:

Input: 170

Output: 120

Explanation: The decimal equivalent of octal 170 is 120.

Question 7 — Convert Number to Words

Problem Statement

Given a number, convert it into the form of words.

Note: Consider a maximum of 4 digits in the number.

Input

A whole number N having at most 4 digits.

Output

Print the number in English words.

Examples

Example 1:

Input: 7824

Output: seven thousand eight hundred twenty four

Explanation: 7824 in words can be written as seven thousand eight hundred twenty four.

Example 2:

Input: 370

Output: three hundred seventy

Explanation: 370 in words can be written as three hundred seventy.
